HOW TO REMOVE YOUR HAIR ADDITION

Before beginning your in-home removal, it is key to prepare for the removal process.

To make your removal easier it is recommended that you wait an additional week or two past your normal service time. Having an extra set of hands will greatly help – consider asking a friend, family member or aid to assist you. Be sure to set aside uninterrupted time for your removal. Remember more remover is not better and will NOT release your hair addition faster. And MOST IMPORTANTLY be patient with yourself as you go through the following removal steps:

1. Starting at the front hairline – lean head back and squirt or spray a small amount of **Bond Remover** along the edge of the hairline and under the hair addition. Begin from the center of the hairline and apply towards the right side of the hairline. Then, return to the center of the hairline and work towards the left side of the hairline.
2. Give the remover time to work allowing it to sit for one minute while you gently massage the Bond Remover under the base of your hair addition until it begins to release from the head.
3. Next, saturate a Q-Tip with Bond Remover and work the Q-Tip under the hair addition to help spread the remover and release the attachment from the scalp and hair. Be sure to take your time and allow the Bond Remover to work. Remember more Remover does not release faster only makes it harder to clean up.
4. Using your finger, a Tail Comb or Q-Tip, gently lift the front of the hair addition and keep adding small amounts of Bond Remover under the hair addition to release the frontal. Be gentle when separating growing hair from hair addition hair being sure not to break or pull the growing hair.
5. Continue to reapply additional Bond Remover, little by little. Gently lift front of hair addition to remove from hair and scalp.

HOW TO REMOVE YOUR HAIR ADDITION

6. Once the frontal area has lifted, lean your head to the side to begin removing hair addition from sides and back.
7. Using Bond Remover begin spraying under the hair addition base exactly as you did with the front hairline.
8. Give the Bond Remover time to work allowing it to sit for one minute while you use your fingers to gently massage the Bond Remover under the base of your hair addition until it begins to release from the head.
9. Next, saturate a Q-Tip with Bond Remover and work the Q-Tip under the hair addition to help spread the remover and release the attachment from the scalp and hair. Be sure to gently separate growing hair away from hair addition base.
10. Continue to reapply additional Bond Remover, little by little.
11. Use your fingers to work Bond Remover under base of hair addition.
12. Gently lift the hair addition base to remove from growing hair.
13. Continue to separate growing hair from under hair addition by reapplying Bond Remover, little by little.
14. Continue to use finger to work Bond Remover under base until hair addition has completely released.

Do not be alarmed if you see hairs attached to the hair addition these are a part of your normal daily hair shedding (a healthy part of the hair growth cycle). These hairs have accumulated over the month period of time and are held by the bond, to the base of your hair addition.
