## REATTACH HAIR ADDITION

The final step of your In-Home Hair Care Kit is to temporarily reattach your hair addition. Remember, this re-attachment is a temporary solution, bridging the time between now and when we can see you for your next full-service appointment.

Please Note The Following Tip:

- You will want to do this in front of a large mirror and have a hand mirror handy to assist you with seeing where you are placing your hair addition.
  1. First, place your hair addition on a rolled-up hand towel with the inside facing up.
  2. Next, comb your growing hair forward - starting ¼” behind the hairline. If hair is too thin, then comb hair back away from the hairline.
  3. If applicable, part your growing hair down the middle with wide tooth comb.
  4. Next, find your hairline – The hairline is approximately 3 to 4 fingers from bridge of nose.
  5. Then, mark a dot on the hairline with an eyeliner pencil.
  6. Next, apply Skin Prep to hair and scalp. Be sure to apply Skin Prep to all areas the hair addition will cover (**Apply Skin Prep firmly, to be sure to reach scalp and to flatten growing hair**).
  7. Allow Skin Prep to cure for 2 minutes.

## REATTACH HAIR ADDITION

8. Place your hair addition back on to rolled-up towel on towel and using a blow dryer on a low and warm setting, slightly heat up the Adhesive Strips before removing the colored backing.
9. Remove all colored backings from the Adhesive Strips.
10. Take your hair addition in both your hands, look down at hand mirror on counter-top and then place the front of the hair addition onto the front hairline.
11. Slowly, work the hair addition from front to back, rolling the hair addition along the top of the head, slightly stretching it similar to putting a band-aid on.
12. Once attached be sure to firmly press around the base with fingertips.
13. To further secure your hair addition take your Friction Free Towel and press it over the top of the hair addition.
14. Continue to press hair addition over the next 10 minutes for best security.
